

# **Math, Comp, and Art to Stay in the Market Smart**

**Secolinsky**

[www.secolinsky.com](http://www.secolinsky.com)

## **Service Overview**

- Software Development
- Business Consulting
- Web Design, Web Programming
- Information Systems and Business Intelligence

## **Specialty**

Building customized open-source software and infrastructure solutions

## **About**

Interpret data to make optimal business decisions from better understanding and predicting market trends. Create designed experiments to obtain data. Use as part of tool set the open-sourced statistical package R, the programming language Python, and python-based web frameworks. Employ methodical methods to create collaborative, reproducible research and data analysis with Git Version Control System. From efforts to create reproducible research, we communicate mathematics and promote mathematical literacy.

## Credentials

- CompTIA A+
- B.A. in Mathematics from San Francisco State University
